### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### **IN THE CLAIMS:**

In claim 1, line 5, "one the one" has been changed to --on the one--.

The above change to claim 1 has been made to correct a typographical error.

### **REASONS FOR ALLOWANCE**

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 6,874,526 to Koetter. The improvement comprises a flow valve with a pressure regulator piston including two control edges and at least one LS control edge provided by which, when the pressure regulator is opened, for load-indicating into the LS line a LS cross-section can be controlled to be opened for tapping off the pressure prevailing in the pressure fluid flow path for the purposes of realizing "dividing" and "accumulating" operating states at a minimum expenditure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **PRIOR ART**

The patent to Koetter is cited for the showing of a flow valve similar to applicant's but lacking a pressure regulator piston including two control edges and at least one LS control edge.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of six patents.

Brand et al., Gerstenberger, Harber et al., Ishihama et al., Dull et al., and Presley are cited to show flow valves.
